TAR for Long Term Care: MDS Form

Page updated: August 2020

This section contains information about the *Minimum Data Set (MDS) – Version 2.0 for Nursing Home Resident Assessment and Care Screening* (MDS 2.0) form. For general policy information, refer to the *TAR Completion for Long Term Care* section of this manual.

Minimum Data Set for Nursing Home Resident Assessment and Screening (MDS 2.0)

Federal law requires that all Nursing Facilities (NFs) establish a uniform system for assessing each resident's ability to perform Activities of Daily Living (ADL). The state has designated the *Minimum Data Set (MDS) – Version 2.0 for Nursing Home Resident Assessment and Care Screening* (MDS 2.0) form as the Resident Assessment Instrument (RAI) to be used by NFs certified by the State to participate in the Medicare and Medi-Cal programs. These NFs are required to conduct resident assessments on a regular basis using the MDS information.

Required Fields on the MDS 2.0 for TAR Authorization

To receive initial authorization, providers must complete the asterisked (*) items on the MDS 2.0 form within 10 working days of admission and attach a photocopy to the completed *Long Term Care Treatment Authorization Request* (LTC TAR, form 20-1). The California Department of Public Health (CDPH) Licensing and Certification Program requires that providers complete the entire MDS 2.0 form within 14 calendar days from admission and keep the completed form in the patient's clinical record. These time frames are identical.

Developing a Resident Assessment Instrument

NFs may use the computerized version of the MDS 2.0 instead of using the MDS 2.0 hard copy form. Any other form developed by an NF must contain exactly the same wording in exactly the same order as the MDS 2.0 form shown in *Figures 1* thru *10* on following pages.

Quarterly Assessments

The Federal Nursing Home Reform Act states that NF residents must be periodically assessed by a uniform system. The Department of Health Care Services (DHCS) Medi-Cal Clinical Assurance & Administrative Support Division (CAASD) requires either the asterisked (*) portions of a recently completed (within the last four months) MDS 2.0 form or the asterisked (*) portions of the *MDS Quarterly Assessment Form* 2.0 be completed and submitted with the LTC TAR requesting reauthorization of services. *The MDS Quarterly Assessment Form* 2.0 is shown in *Figures 11* and *12* on following pages.

The CDPH Licensing and Certification Program requires NFs to document assignment of all the data elements contained on the Quarterly Assessment form every quarter. NFs may use the computerized version of the *MDS Quarterly Assessment Form* 2.0 or the hard copy form.

Ordering the State Operations Manual and the LTC RAI Training Manual

Instructions for completing the MDS 2.0 form are in the *State Operations Manual, Transmittal #272,* and the *Health Care Financing Administration's Long Term Care Resident Assessment Instrument (RAI) Training Manual* – Version 2.0. These publications are available through the National Technical Information Services, U.S. Department of Commerce. To receive a copy, call 1-800-553-6847 and ask for publication number PB-95950007 (Transmittal #272) or PB-96109053 (RAI Training Manual).

   - Describe:
     — Nature of the condition (may include presence or lack of objective data and subjective complaints).
     — Complications and risk factors that affect your decision to proceed to care planning.
     — Factors that must be considered in developing individualized care plan interventions.
     — Need for referrals/further evaluation by appropriate health professionals.
   - Documentation should support your decision-making regarding whether to proceed with a care plan for a triggered RAP and the type(s) of care plan interventions that are appropriate for a particular resident.
   - Documentation may appear anywhere in the clinical record (e.g., progress notes, consults, flowsheets, etc.).
3. Indicate under the Location of RAP Assessment Documentation column where information related to the RAP assessment can be found.
4. For each triggered RAP, indicate whether a new care plan, care plan revision, or continuation of current care plan is necessary to address the problem(s) identified in your assessment. The Care Planning Decision column must be completed within 7 days of completing the RAI (MDS and RAPs).
