
Injections: Code List

Page updated: March 2026

The example in this section is to help providers bill injection services on the *UB-04* claim form. «For detailed policy information, refer to the *List of Physician-Administered Drugs and HCPCS Codes* and *Injections: Hydration* sections of this manual.»

Refer to the *UB-04 Completion: Outpatient Services* section of this manual for instructions to complete claim fields not explained in the following example. For additional claim preparation information, refer to the *Forms: Legibility and Completion Standards* section of this manual.

Billing Tips:

When completing claims, do not enter the decimal points in ICD-10-CM codes or dollar amounts. If requested information does not fit neatly in the *Remarks* field (Box 80) of the claim, type it on an 8½ x 11-inch sheet of paper and attach it to the claim.

Unlisted Therapeutic Injection: “By Report” Billing

Figure 1. Unlisted therapeutic injection: “By Report” billing.

This is a sample only. Please adapt to your billing situation.

In this example, a woman receives an injection of Labetalol for treatment of accelerated hypertension. Labetalol is designated as an “unlisted therapeutic injection” because it is not assigned a unique HCPCS code.

Enter the two-digit facility type code “83” (special facility – ambulatory surgery center) and one-character frequency code “1” as “831” in the *Type of Bill* field (Box 4).

Enter the procedure code for unlisted therapeutic injection (CPT® codes 96372 and 96379) on claim line 1 in the *HCPCS/Rate* field (Box 44).
