## Modifiers Used with Procedure Codes

---

Page updated: February 2021

The following charts list procedure codes with their corresponding required or allowable modifiers. The column headings of the charts are described below.

### Service or Procedure

The “Service or Procedure” column lists services according to the categories in the HCPCS and CPT® code books.

### Required Modifiers

The “Required Modifiers” column refers to services or procedures that require a split-bill modifier:

- 26: Professional Component
- TC: Technical Component
- 99: Multiple Modifiers. Explain in the *Remarks area/Additional Claim Information* (Box 19) of the claim form. For further information about billing with modifier 99, see the *Surgery: Billing With Modifiers* section in the appropriate Part 2 manual.

**Note:** Do not bill modifier 99 in conjunction with modifier 26 and TC. The claim will be denied.

When billing for both the professional and technical service components on a split-billable claim, a modifier is neither required nor allowed. This change does not apply to Magnetic Resonance Imaging (MRI), Magnetic Resonance Angiography (MRA), and Positron Emission Tomography (PET) codes. Refer to the appropriate sections of the Part 2 provider manual for billing instructions.

## **Codes or Code Ranges**

The “Codes or Code Ranges” column lists the specific code or range of codes that either require a modifier or may need an allowable modifier for billing.

The listed code ranges may include codes that are not benefits of the program or are not payable codes. Therefore, individual codes should be checked against the *TAR and Non-Benefit List: Codes 10000 thru 99999*, and specific code policy section in the appropriate Part 2 manual.

## **Allowable Modifiers**

The “Allowable Modifiers” column refers to services or procedures that may use certain allowable modifiers to indicate that the procedure or service has been altered by some specific circumstance but not changed in its definition or code. For a list of approved modifiers, refer to the *Modifiers: Approved List* section in this manual.

Some procedures do not need further clarification with a modifier. Use of modifiers other than those listed in the *Modifiers: Approved List* may result in the claim being denied.

## **Modifier 33**

Modifier 33 (preventive service) is not listed in the following charts as this modifier is allowable for all procedure codes. If used, modifier 33 must not be billed in the first modifier position on the claim.

## **NCCI-Associated Modifiers**

«The National Correct Coding Initiative (NCCI)-associated modifiers are those modifiers allowed, in applicable circumstances, to bypass an NCCI Procedure-to-Procedure (PTP) edit. Refer to the *Correct Coding Initiative: National* section for more information.»

## **Ophthalmologic Modifiers**

For information about modifiers used for ophthalmological services, refer to the *Ophthalmology* section in the appropriate Part 2 manual.

## **Telehealth Modifiers GQ and 95**

For information about telehealth modifiers GQ and 95, providers may refer to the *Medicine: Telehealth* section in the appropriate Part 2 manual.

## **Additional Modifier Information**

For further information about required or allowable modifier usage for specific procedure codes, please refer to specific policy sections.
