# California Children's Services (CCS) Program Special Care Center

---

Page updated: September 2020

This section contains information about California Children's Services (CCS) Special Care Centers (SCCs).

## **SCC**

The CCS program has a system of SCCs throughout the state, providing comprehensive, coordinated health care to children with complex, handicapping medical conditions. SCCs are multidisciplinary, multispecialty teams that evaluate a client's medical condition and develop a comprehensive, family-centered plan of health care for the client. SCCs facilitate provision of timely, coordinated treatment for the CCS client and are usually located in conjunction with CCS approved tertiary level medical centers. Each SCC is individually reviewed and approved by CCS to ensure that it complies with CCS program standards.

## **List of SCCs**

A list of SCCs is available on the "CCS/GHPP Special Care Center Directory" Web page at the CCS Web site ([www.dhcs.ca.gov/services/ccs](http://www.dhcs.ca.gov/services/ccs)). Providers may search the Directory according to SCC type, such as cardiac or craniofacial; facility or hospital name; or SCC number.
